

The StandbyU Shield

Safety through Connections

More than a personal alarm, the Shield is designed to connect those at risk of domestic and family violence and abuse to their chosen support network wherever they are, 24 hours a day.

We understand the impacts of abuse or violence, whether you're still in the relationship or you've left. The Shield gives you a secret and secure way to connect to your chosen responders by simply pressing a button.

How it Works

When you're feeling worried or need help, press the SOS button on your Shield device.

The device silently calls your responders with live audio and the GPS location of the device.

Your responders can talk to each other in a conference room and assess the audio.

Your Responders will activate your safety plan, with everyone's safety in mind.

Contact Us

If you have any questions, you can call our Shield Team on 1800069010 or email us at yourshield@standbyu.org.au

The Shield Difference

- Easy to activate SOS button.
- GPS location updates every 5 minutes.
- One way audio for safety.
- Confidential safety planning consultation with one of our caring, experienced Practitioners.
- A Shield Safety Plan for your individual situation and safety concerns.
- Choose up to 5 people for your support network of responders.
- Enables you to get support when you're worried - before a situation becomes an emergency.
- Option for Responders to bring emergency services into the SOS call with them to attend.
