

The StandbyU Shield

What is the Shield

The StandbyU Shield is a safety solution for anyone experiencing domestic or family violence or abuse, whether you still live with your abuser or you've recently escaped but the fear and risk are still very real.

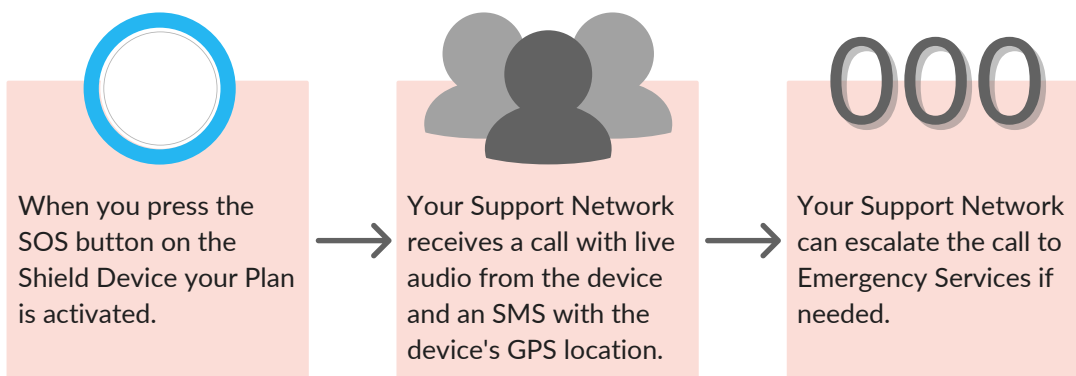

It combines the strength of human connections with the power of technology to create a secret and secure way for people at risk to be connected to family and friends in the moments that count.

How does the Shield work

The Shield Device:

- Is lightweight and small with an easy to use SOS button.
- Provides one-way audio only to ensure discrete and safer usage.
- Provides real time location updates every 5 minutes.
- Vibrates when the battery starts to get low.

**Because
Connections
Change Lives**
